## EXECUTIVE PROFILE

Senior data and evaluation leader with extensive experience designing enterprise data strategy, governing secure cloud based analytics environments, and leading multidisciplinary data teams in health and social sector contexts. Proven ability to align infrastructure with program evaluation, performance measurement, and executive decision making. Former tenured professor with deep expertise in health data, administrative data integration, and rigorous impact analysis.

## CORE LEADERSHIP CAPABILITIES

Player-Coach Leadership Style
Enterprise Data Strategy and Governance
Program Evaluation and Impact Measurement
Health and Administrative Data Integration
AWS Redshift Analytics Oversight
Metric Standardization and KPI Development
Data Quality, Validation, and Documentation Standards
HIPAA Aligned Data Stewardship
Team Leadership and Cross Functional Collaboration
Technical Fluency: AWS Redshift, SQL, R, Python, Snowflake, SAS

## PROFESSIONAL EXPERIENCE

Coleridge Initiative
Senior Research Scientist
• Provide strategic oversight of secure, cloud based analytical data environments supporting multi agency administrative datasets, ensuring infrastructure aligns with program evaluation and reporting needs.
• Partner with data engineers to design and refine dimensional data models in AWS Redshift that support longitudinal performance monitoring and cross program analysis.
• Establish enterprise metric definitions, validation standards, and documentation practices to ensure analytic consistency and auditability across projects.
• Translate funder and stakeholder requirements into analytic frameworks and evaluation plans, aligning data assets with measurable program outcomes.
• Develop executive ready dashboards and analytic summaries to support strategic decision making and continuous improvement.
• Mentor and supervise data scientists and analysts, strengthening organizational capacity in analytics, governance, and reproducible research practices.

USAA
Lead Decision Science Analyst
• Supported enterprise decision making by defining performance metrics and overseeing rigorous analytical workflows across business units.
• Ensured data quality, methodological integrity, and reproducibility across analytical pipelines used for strategic decisions.
• Collaborated with cross functional teams to translate operational goals into measurable performance indicators and analytic deliverables.
• Mentored analysts in statistical modeling, SQL based analysis, and metric interpretation.

The University of Texas at San Antonio
Associate Professor with Tenure
• Led federally funded research programs integrating survey and administrative health data to evaluate population health outcomes and disparities.
• Designed comprehensive data management and analysis plans across complex, multi-source health datasets.
• Applied advanced statistical methods to longitudinal health data and translated findings for policymakers and practitioners.
• Mentored graduate researchers in health data analytics, research design, and evidence based decision making.
• Published over 40 peer reviewed articles and presented research nationally and internationally.

## EDUCATION

PhD, Demography and Anthropology, Pennsylvania State University
MA, Anthropology, University of Tennessee
BA, Anthropology
